EXPERIENCE

Cashier/Waiter

XZH II INC

June 2020 – Present, Watertown, MA

- managed customer transactions with efficiency and provided excellent service by taking orders, serving food, and ensuring a pleasant dining experience. Responsibilities also included handling reservations, addressing customer inquiries, and maintaining a clean and organized work area.

PROJECTS

Self Started Event

Epic Coding Camp • July 2023 – July 2023

- Epic Coding Camp is a self-started event aimed at providing youth with opportunities to learn about computer science (CS) and STEM. The program offers a Free Summer CS Course, fostering interest and knowledge in the fields of technology.
- As the founder, I taught CS to 20+ students in grades 6–8. I researched teaching pedagogy to enhance the learning experience. I organized CS-related activities and lessons, creating an engaging and interactive environment. I guided students in the creation of their own projects, encouraging creativity and practical application of coding skills.

AI and Data Science Core: Machine Learning and Spontaneous Speech Processing

Neoscholar • May 2023 – July 2023

- Offered by Neoscholar in the CIS Online Research Program, this course delved into machine learning and spontaneous speech processing. I acquired skills in these domains, focusing on natural language processing. I contributed to a research paper on constructing Knowledge Graphs from text using REBEL, gaining practical insights into AI applications

BWSI Online Course – Autonomous Cognitive Assistance

Beaver Works Summer Institute • January 2023 – March 2023

- Completed as part of the MIT Beaverworks Summer Institute prerequisite course, this online course covered Python programming, Version Control, and Autonomous Cognitive Assistant. The curriculum provided a comprehensive understanding of Python, version control systems, and the development of autonomous cognitive systems.
